

# Cable-32SAS47

**Cable-32SAS47** is used to split into four SATA 7pin connectors from 32pin Host SAS connector. SAS and SATA are the common interfaces in storage devices and SAS is the next-generation interface standard for SCSI-based system. This cable will meet the demand of the latest technology and is the perfect solution for the latest data storage devices. Spectra-strip technology provides end-to-end signal integrity. The extra long 30" in length provides flexibility in space arrangement.

- 1 x 32pin SAS Connector (Male)
- 4 x 7pin SATA Connector (Male)
- Length is 30 inches
